

WITCOM PREMIUM INTERNET ACCESS: PREMIUM SERVICE!

Premium Internet with premium services for your company

WHAT IS WITCOM PREMIUM INTERNET ACCESS?

WITCOM PREMIUM INTERNET ACCESS is your premium access to the Internet. With symmetrical bandwidths of 2 Mbit/s up to 10 Gbit/s you and your company are professionally well prepared. With guaranteed, stipulated bandwidths via a WITCOM fibre-optic connection we connect you around the globe using sustainable technology because fibre-optic links are nearly indefinitely scalable and already today provide you with sufficient capacities to meet the bandwidth challenges of tomorrow. Your company site can also benefit from a connection to our network, as the link to a fibre-optic network stimulates commercial use. Owners of buildings can raise the value of their property by developing their buildings and reevaluate them for their customers. With more and more data-intensive networking of services and production processes, a powerful Internet access contributes to the success of your company. There is no other transmission medium than fibre optic that offers more bandwidth reserves and, therefore, maximum expansion possibilities. WITCOM provides professional connection to the Internet for your locations.

WITCOM PREMIUM INTERNET ACCESS: PREMIUM SERVICE!

HOW DOES IT WORK IN DETAIL?

WITCOM PREMIUM INTERNET ACCESS provides you with 100 % availability for the chosen and contractually stipulated bandwidth in download and upload at any time. Symmetrical high speed for video and phone conferences, surfing, and data-consuming applications and more. In addition, sustainable fibre-optic technology enables you to scale the speed of your WITCOM PREMIUM INTERNET ACCESS depending on the requirements of your company. You can choose from a range of 2 Mbit/s to 10 Gbit/s as usable bandwidth without volume limitation. The network termination unit (CPE) available to you on loan during your contract term is a powerful premium router with guaranteed transfer rates. Your connection includes five static public IPv4 addresses freely usable by you and one IPv6 network. They are routed to the LAN interface at the network termination unit (router) and provided to you as access data. We will set up the network termination unit at your place and hand over the access in the vicinity of your service line panel or, by using optionally available in-house cabling, at your desired location. Benefit from one Gigabit Internet access, prioritisation of your most important applications through Quality of Service (QoS), highest level security and reliability, minimum availability of 99.95 % of your connection as well as a maximum fault clearance time of eight hours in case of a failure. The minimum contract term is 12 months, a fidelity rebate is available when extended to 60 months. Online statistics give you the necessary transparency about the utilization of your WITCOM PREMIUM INTERNET ACCESS.

Using WITCOM PREMIUM INTERNET ACCESS your communication reaches a new dimension of speed - on 365 days a year and 24 hours a day!

YOUR BENEFITS AT A GLANCE!

- Symmetrical, guaranteed bandwidth of 2 Mbit/s to 10 Gbit/s as flat rate model without volume limitation
- 5 statically usable IPv4 addresses as well as a full /48 IPv6 network included
- Online statistics of the Internet connection with 5 minutes values to depict your needs
